

INTEGRATED MARINE DEBRIS OBSERVING SYSTEM

## From vision to implementation

Artur Palacz (IOCCP/IOPAN), Audrey Hasson (GEO Blue Planet/MOi)

EUROqCHARM Final Conference  
12 October 2023, Brussels, Belgium

Funded by  
the European Union

# Why do we need an Integrated Marine Debris Observing System (IMDOS)?

Monitoring of marine litter initiated to various degrees through Action Plans of the Regional Seas Programme and other countries

Ongoing efforts to harmonise and standardise monitoring methods regionally and globally

**But there is no global coordination or integration of marine debris monitoring**

# Community vision for an IMDOS

## Toward the Integrated Marine Debris Observing System

- Integration of **remote sensing and in situ observations**
- Use of **models to optimize the design** monitoring system
- Interaction with other observing systems monitoring physical, chemical and biological processes in the ocean and on shorelines
- Engagement of **volunteer and citizen science initiatives**
- Establishing **best practices and harmonized methodologies** for the different elements of the observing system
- Enabling **synthesized data** to support innovative research and serve a diverse community of users

*Also calling for identification of relevant EOVS(s).*

# IMDOS as a joint initiative of

In collaboration with among others:

## Integrating Marine Litter Monitoring to Inform Action

A global instrument to address a global pollution

29 June 2022 - Centro Cultural de Cascais, Portugal

Initial support through:

SOCIETAL NEEDS FOR INFORMATION

OBSERVATIONS REQUIREMENTS

OBSERVING ELEMENTS

DATA HARMONIZATION

SUSTAINED OBSERVATIONS

INCREASE OF TECHNICAL READINESS LEVELS

COORDINATION & GUIDANCE

FEDERATED & INTEROPERABLE DATA MANAGEMENT SYSTEMS

RESEARCH

DATA-BASED INFORMATION FOR SCIENCE & DECISION-MAKING

E.G. INDICATORS, POLICY BRIEFS, SCIENTIFIC PAPERS, ASSESSMENTS, TOOLS, ETC.

# Vision

A globally coordinated and sustained observing system of marine debris addressing knowledge gaps and diverse stakeholder needs with adequate data and information.

SOCIETAL NEEDS FOR INFORMATION

OBSERVATIONS REQUIREMENTS

OBSERVING ELEMENTS

# Mission

Provide coordination and guidance to lead the marine debris community in establishing a sustained global observing system.

DATA HARMONIZATION

SUSTAINED OBSERVATIONS

INCREASE OF TECHNICAL READINESS LEVELS

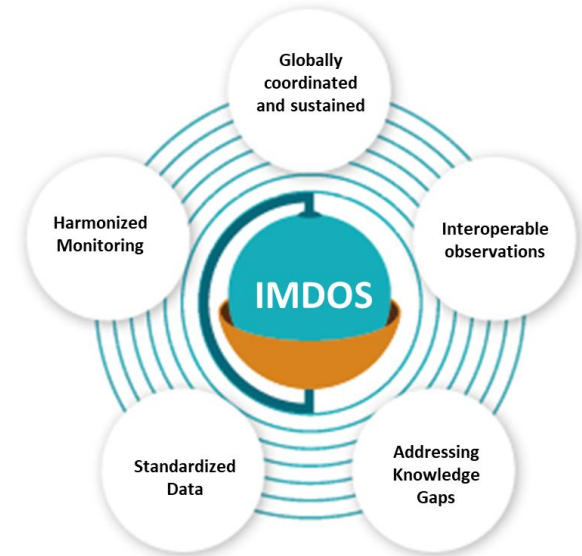

COORDINATION & GUIDANCE

FEDERATED & INTEROPERABLE DATA MANAGEMENT SYSTEMS

RESEARCH

DATA-BASED INFORMATION FOR SCIENCE & DECISION-MAKING

E.G. INDICATORS, POLICY BRIEFS, SCIENTIFIC PAPERS, ASSESSMENTS, TOOLS, ETC.

# Guidance from an international interim Steering Committee

**Stefano Aliani** (CNR ISMAR, Italy)

**Paolo Corradi** (ESA, Netherlands)

**Francois Galgani** (Ifremer, France)

**Georg Hanke** (JRC, Italy)

**Kara Lavender Law** (SEA, USA)

**Nikolai Maximenko** (Uni Hawaii, USA)

**Toste Tanhua** (GEOMAR, Germany)

**Alexander Turra** (Uni São Paulo, Brazil)

## Coordination:

**Audrey Hasson** (Mercator/GEO BP, France)

**Artur Palacz** (IOCCP/IOPAN, Poland)

# Strategic Objectives

## System Integration and Delivery

- Enhance synergies between in-situ and remote sensing
- Integrate modelling and observing capabilities
- Promote citizen science and innovative observing initiatives
- Support the increase of observing elements TRLs

## Engagement and Coordination

- Coordinate existing and new initiatives
- Advocate for a sustainable global observing system
- Engage with relevant science and decision-making stakeholders
- Advise on information products for assessment reports

## Authoritative Guidance

- Provide recommendations on design and evolution
- Guide assessment and harmonization of methodologies
- Promote guidelines for a federated data management system
- Develop FAIR data collection and sharing guidelines

**Provide recommendations for the design and evolution of the observing system for marine debris.**

**How?**

# Essential Ocean Variable Specification Sheet

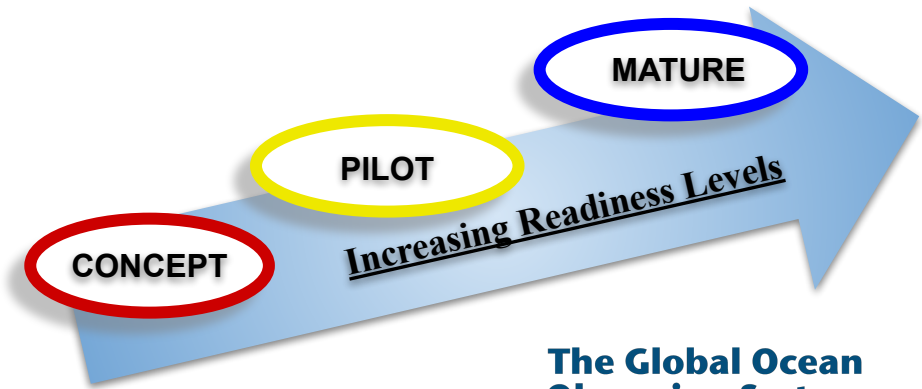

**NEW**

## Marine Plastics Debris

<b>Name of EOVS</b>	Marine Plastics Debris
<b>EOV sub-variables</b>	<ul style="list-style-type: none"><li>• beach litter: abundance per type &amp; size category</li><li>• floating microplastics: abundance, weight</li><li>• floating macroplastics: abundance</li><li>• seafloor litter: abundance per type &amp; size class (macro, micro)</li></ul> <p><i>Additional sub-variables under consideration:</i></p> <ul style="list-style-type: none"><li>• Macroplastics in biota (ingestion by seabirds, fish, sea turtles)</li><li>• Microplastics in biota (ingestion by seabirds, bivalves)</li></ul>

- Based on GESAMP WG40 recommendations for global scale monitoring
- Setting global requirements for what to observe, when, where and how
- Concept of TRLs used to describe the maturity of different EOVS elements → direct application of EUROqCHARM’s work on the RAPs and respective TRL assessment

**Promote the development of a global network of marine debris observations (e.g. for surface microplastics)**

**How?**

# What does it take to build an observing network?

Observations sustained over multiple years

Data and metadata delivered free, open and in a timely manner

Standards and best practices developed and followed

Community-of-practice with a multi-year strategy and implementation plan

Capacity development and technology transfer to ensure inclusivity

Tracking and assessment of progress

The Global Ocean Observing System

# What does it take to build an observing network?

# The value chain of marine debris observations

user feedback on data adequacy

**IMDOS**  
INTEGRATED  
MARINE  
DEBRIS  
OBSERVING  
SYSTEM

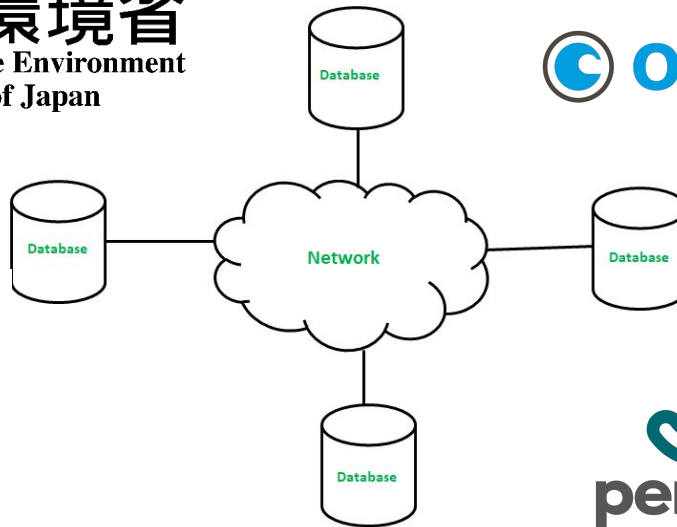

**Promote guidelines for a federated and interoperable data management system.**

**How?**

# A federated & interoperable data management system [for surface MP]

[digital.gpmarinelitter.org](http://digital.gpmarinelitter.org)

**Engage and coordinate existing and new initiatives.**

**How?**

## Take-home message

---

If adequately supported, **IMDOS** can be the vehicle for ensuring the legacy of **EUROqCHARM** among other projects worldwide.

The success of **IMDOS** will also depend on the existence of projects which **follow-up on the successful outcomes of those dedicated to marine debris monitoring, such as EUROqCHARM.**
