

# Experiences with Horti-BlueC Strawberry growing media blends

- 5 trials: - Blends BL05\_S, BL06\_S; BL07\_S, BL08\_S, BL\_10\_S
- 20.000L new blends
- 60 day crops and double cropping

Conclusions:

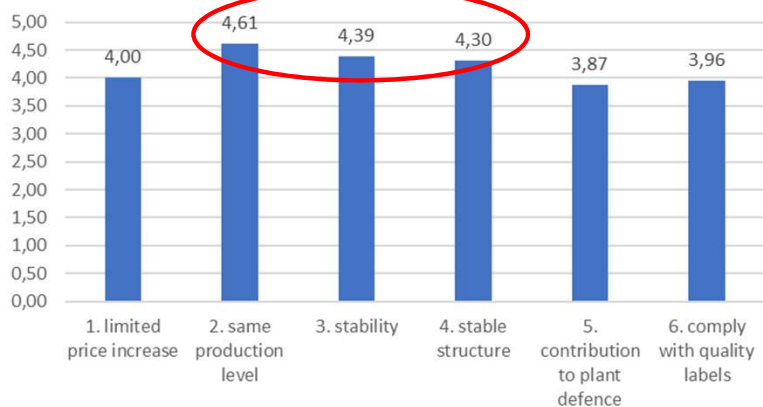

- No effect on Yield or grading
- No adaptation of the fertigation scheme or strategy is needed

→ All tested blends can be used in a strawberry cultivation system without any side-effect

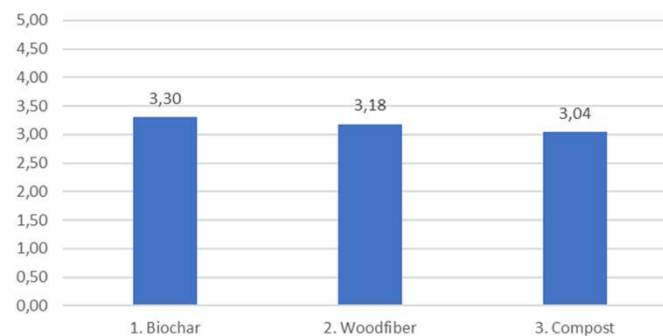

# Growers opinion

which parameters are most important to you for a more sustainable substrate?

Which additives do you prefer to replace peat/cocos?

This project has received funding from the Interreg 2 Seas Programme 2014-2020 co-funded by the European Regional Development fund under subsidy contract No 2S03-046 Horti-BlueC
