

REFOREST

Agroforestry at the forefront of farming sustainability in multifunctional landscapes in Europe

"We know that agroforestry is a very good alternative to modern agricultural monocultures, our project aims to facilitate its adoption in Europe"

EU funding

Reforest is a Horizon Europe-funded project aiming at fostering innovation, supporting knowledge exchange, and providing novel solutions to empower farmers in European Union and associated countries to deliver multiple objectives: food production, carbon capture, and biodiversity.

Challenges

- lack of knowledge
- impact of tree planting on farm business
- unclear policy support

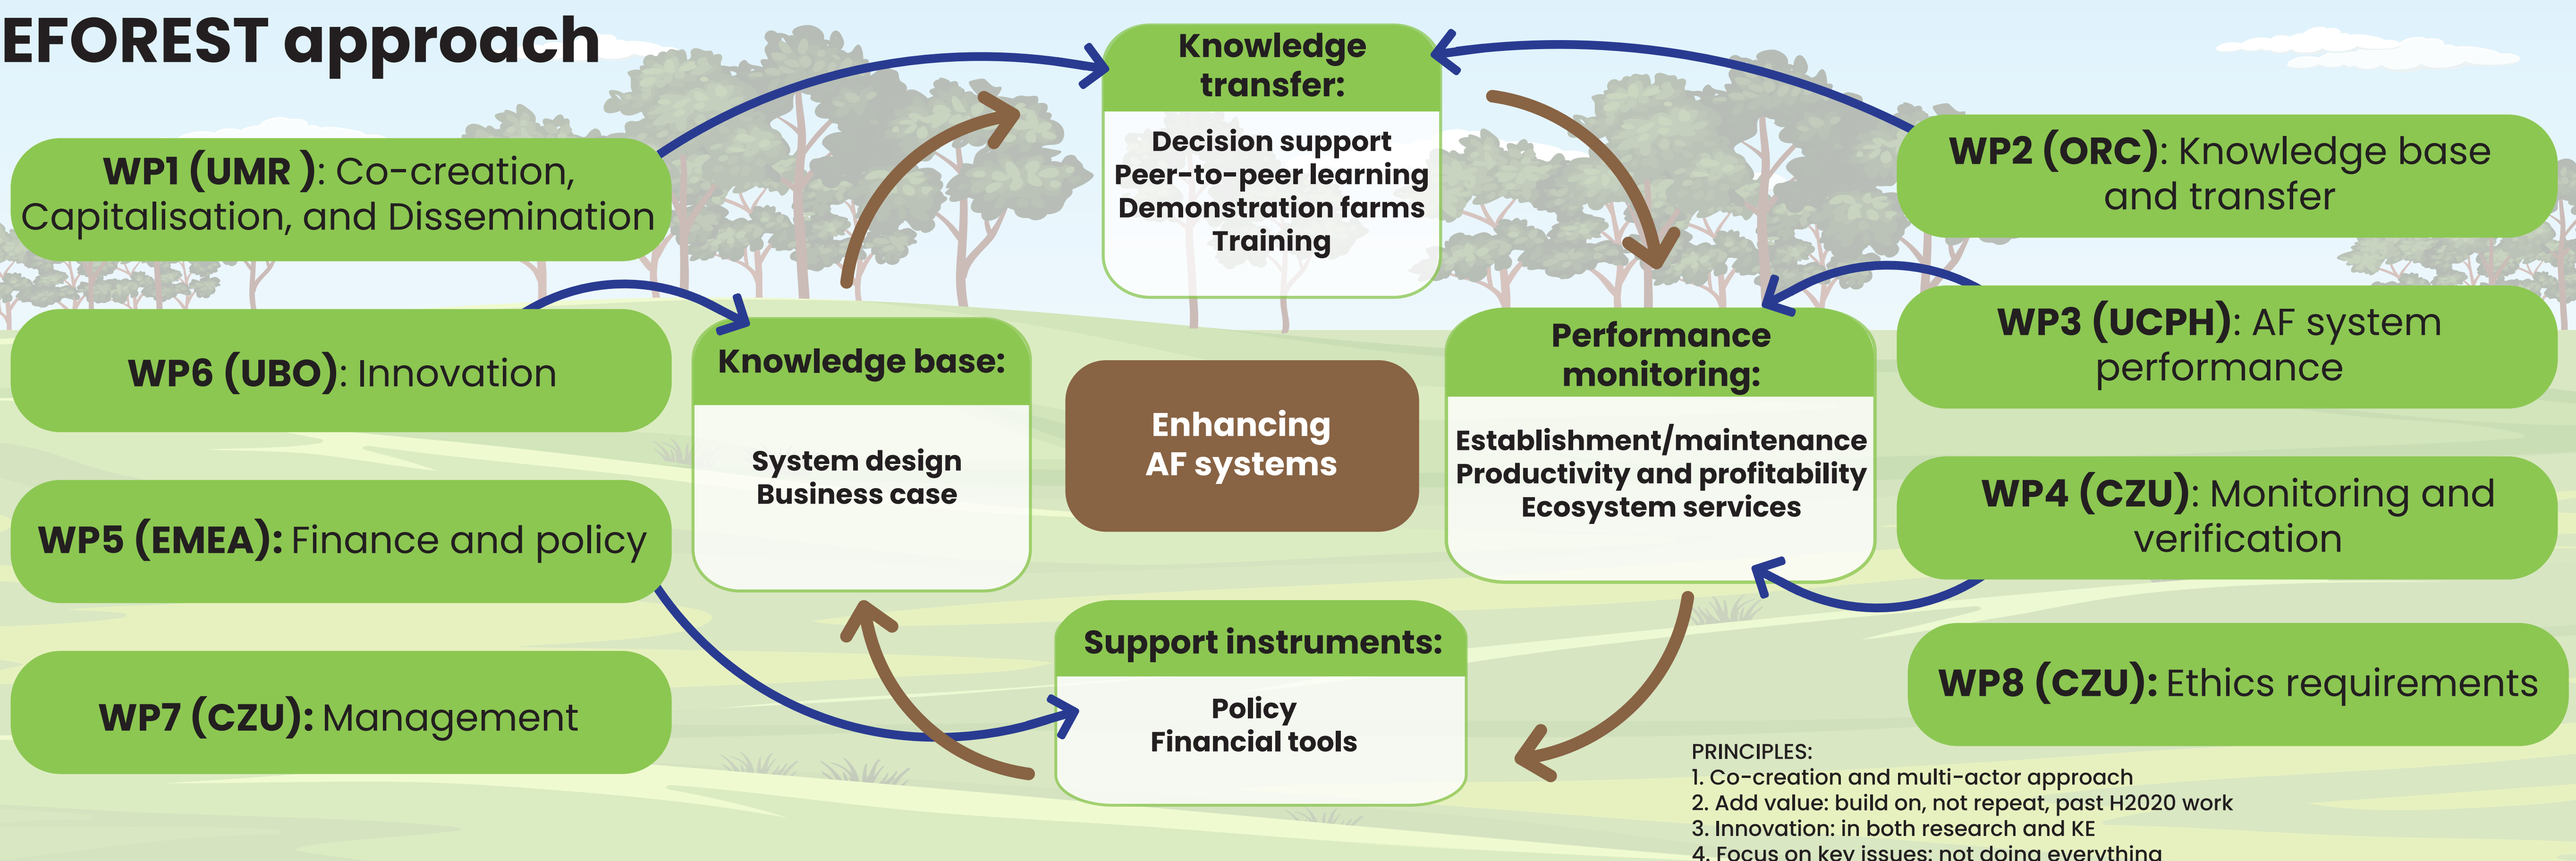

Solutions

- knowledge transfer, training and innovation
- policy interventions

Results

producing food while significantly improving the environmental sustainability

REFOREST approach

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or the European Research Executive Agency (REA). Neither the European Union nor the granting authority can be held responsible for them.
